Hypertension Canada is the country’s only national non-profit organization dedicated solely to the prevention and control of hypertension and its complications. Powered by a professional volunteer network of the nation’s leading multidisciplinary experts, Hypertension Canada pursues its mission through research, professional and public education, and advocacy for healthy environments. What drives us

At Hypertension Canada, our mission and vision are at the core of everything we do. We foster the health care professional’s network for excellence in hypertension research, education, and care.

Mission: Advancing health through the prevention and control of high blood pressure and its complications.

Vision: Canadians will have the healthiest and best managed blood pressure in the world.

How we’ll get there

- Inspire innovation
  Hypertension Canada is proud to invest in promising and talented hypertension investigators. We support the important work of current and future investigators through strategic partnerships; we foster career mentoring and succession planning; and collaboratively work with clinicians and patients to set hypertension research priorities.

- Invest in education
  Hypertension Canada creates and publishes the world-renown clinical practice guidelines for hypertension diagnosis, treatment, and control, and supports health care professionals in their application. The Hypertension Canada Guidelines are developed by a multi-disciplinary task force and are rigorously reviewed and annually updated. We provide a suite of accredited educational programs for health care professionals based on the guidelines, and create educational resources for professionals to use with their patients.

- Initiate conversations
  Hypertension Canada works with stakeholders, partners, and government to improve awareness, prevention, and treatment of hypertension and its complications. We make it our business to keep abreast of issues affecting people with hypertension and the professionals who treat them, and seek opportunities to make positive changes that bring us closer to achieving our mission.

- Intentionally engage
  Our work is most effective when we collaborate. Hypertension Canada proudly leads the conversation on emerging hypertension issues, and engages our community in innovative new ways. We strive to connect with diverse professionals and partners to chart the most effective and collaborative approaches to our work. And together, we advance health through the prevention and control of hypertension and its complications.

Who we are

Vision:
Canadians will have the healthiest and best managed blood pressure and its complications.
